

YOU GOT 'EM? WE STOP 'EM.

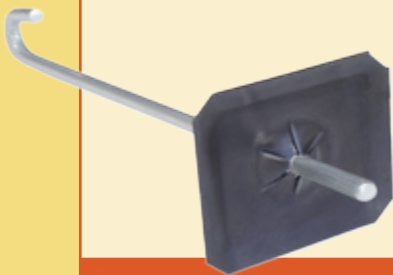

Pigeons and squirrels are a problem no more, with the Spiffy Clip™ Pest Deterrent System

Keep the critters in their place — out from beneath your modules. Our simple, secure system finally lets you easily and affordably seal up residential PV systems from intrusion. A tight fit deters entry from all sides, including at the roof line.

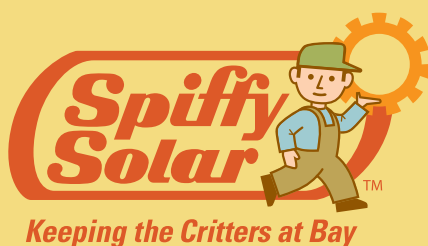

- No Roof or Module Penetration
- No Special Tools
- Quick and Easy Installation
- All Non-Corrosive Material
- Unobtrusive Black Color — blends into shadows beneath modules
- Minimal Cutting and Trimming

Components consist of 8 inch tall, 100 lineal foot rolls of black, PVC coated screen and Spiffy Clips, sold one hundred per box.* Little folding or cutting is required and the clips attach with nothing more than a pair of linesman pliers.

Safeguard your production guarantee. Instill peace of mind for yourself, your customers and your third-party owners. Pigeons, squirrels, raccoons, roof rats? Whatever you got, they're a problem no more.

- Box of 100 Spiffy Clips
- 100 Lineal Ft. Roll of 8 Inch Tall, 1/2 Inch Grid, Galvanized and PVC Coated Screen

* Approximately 50-75 clips are required per 100 lineal feet of coverage, depending on system configuration and other variables.
